

CREATION OF ACL-CREATE

1. Click New to create a new ACL(Create)
2. Enter the following details:
 - Type: record
 - Operation: create
 - Name: u_institution_details
 - Active: true
3. In the Requires role related list, add:
 - bb2 (custom role)
4. No need to add any Data condition
5. Save the ACL Record

The screenshot shows the ServiceNow 'Access Control - u_institution_details' configuration page. The form includes the following fields and values:

- Type: record
- Operation: create
- Application: Global
- Active: ☒
- Admin overrides: ☒
- Advanced: ☐
- Decision Type: Allow If
- Protection policy: -- None --
- Name: u_institution_details
- Description: Allow create for records in u_institution_details, for users with role bb2.

Below the form is a 'Conditions' section with a blue box containing the following text:

Access Control Rules have two decision types, and these types will behave differently depending on conditions.

1. Allow Access: Allows access to a resource if all conditions are met. Additional ACLs may grant access to records where this ACL has not granted access.
2. Deny Access: Denies access to a resource unless all conditions are met. Additional ACLs may not grant access to records where this ACL has denied access.

A link for [More Info](#) is provided below the text.

At the bottom, there is a 'Requires role' section with a pagination indicator showing '1 to 1 of 1'.
