

Ideation Phase

Define the Problem Statements

Date	30 September 2026
Team ID	MKU201Team66ab4dee00fc666a751b56cd7
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	<i>Describe customer with 3-4 key characteristics - who are they?</i>	Describe the customer and their attributes here
I'm trying to	<i>List their outcome or "job" the care about - what are they trying to achieve?</i>	List the thing they are trying to achieve here
but	<i>Describe what problems or barriers stand in the way – what bothers them most?</i>	Describe the problems or barriers that get in the way here
because	<i>Enter the "root cause" of why the problem or barrier exists – what needs to be solved?</i>	Describe the reason the problems or barriers exist
which makes me feel	<i>Describe the emotions from the customer's point of view – how does it impact them emotionally?</i>	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow administrator who manages student and institution records on the instance	Restrict record access so that only EEE branch users can view records where the Branch field is EEE, while I keep full access	Users who do not belong to the EEE branch, or who have no assigned role, can still view the records in the Institution Details table	No script-controlled read ACL with a Branch is EEE data condition exists on the u_institution_details table	Worried and concerned about exposing sensitive student data
PS-2	An EEE branch user with custom roles (bb1 to bb4) assigned in ServiceNow	View only the EEE branch records and perform create, write and delete actions allowed by my assigned roles	I cannot open other branch records, and create, write or delete actions fail when the matching role is missing	Separate ACLs for read, create, write and delete each require a specific role (bb1, bb2, bb3, bb4) and the read script allows only bb1 and admin	Restricted and unsure which role gives which access
